Definitions

Cost of funds is defined as interest (dividends) paid or accrued on deposits, on FHLB advances and on other borrowed money during a reporting period as a percent of average deposits and borrowings; the ratio is reported on an annualized basis. It reflects rates on all funds, not on new funds.

Monthly median cost of funds ratio is defined as interest (dividends) paid or accrued on deposits, FHLB advances and on other borrowed money during a month as a percent of balances of deposits and borrowings at month end. It reflects rates on all funds, not just new funds. Ratio is annualized by multiplying by 12 and adjusted for variation in length of month. The index was first introduced in December 1982

(1) Effective with the January 1999 index, the OTS is using a revised methodology that dampens significantly the month-to-month volatility in the index caused by the change in the number of days in the month. In addition to some other technical modifications, the new methodology assumes an average length of month of 30.4375 days, the average number of days in a month over a four-year period. The index value for January 1999 using the old methodology would have been 4.71%.

*Actually announced on April 10, 1991 not April 9, 1991 as stated in previous editions.
